### THE BEST INTERNAL RETRO FITTING DRAUGHT CUTTING LETTER BOX

Does your letter box leak cold air and what do you pay for this?

1. Does your letter box rattle, bang, bite or snap?
2. Does your post get jammed half way through?
3. Is the size of your letter box limited to what can be delivered through the rear?

# Save Energy & Money

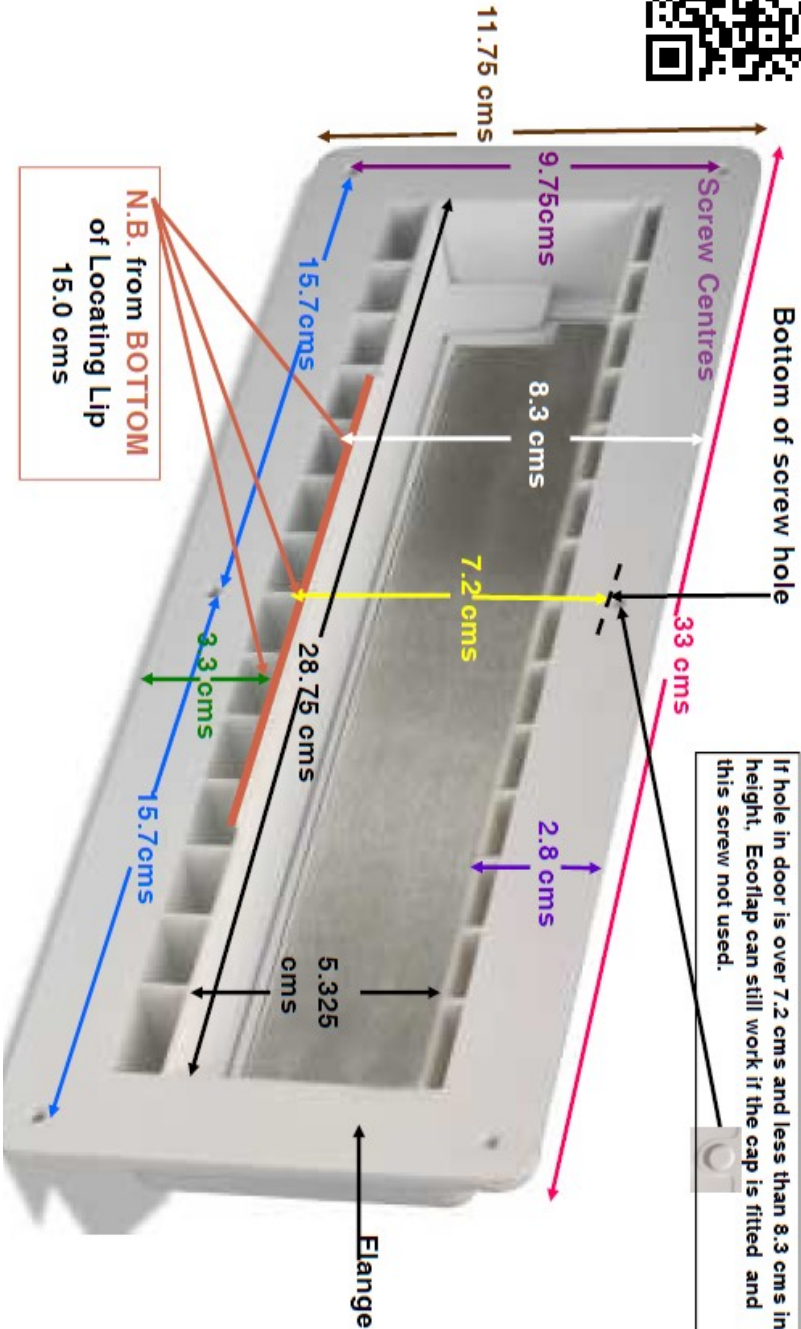

Call 0118 9872 398 anytime!

Then Ecoflap will help you sort these. NO brushes, NO springs to trap post, damage mail (or fingers) and automatically opens to those A4 plus thick deliveries

**British Invention**

#### Guide to the Fitting Measurements

Bolts protruding from outside flap, including the nuts, must not be wider than 28.75 cms to be able to fit INSIDE Ecoflap recess—otherwise the bolts will need to be recessed. The hole can be larger so long as it is within the flange.

If hole in door is over 7.2 cms and less than 8.3 cms in height, Ecoflap can still work if the cap is fitted and this screw not used.

# Prepare your Letter Box for the Winter!

**Your post comes through,  
big or small**

**Flap returns to  
closed position**
